Uveitis / Ocular Inflammation in the COVID-19 pandemic

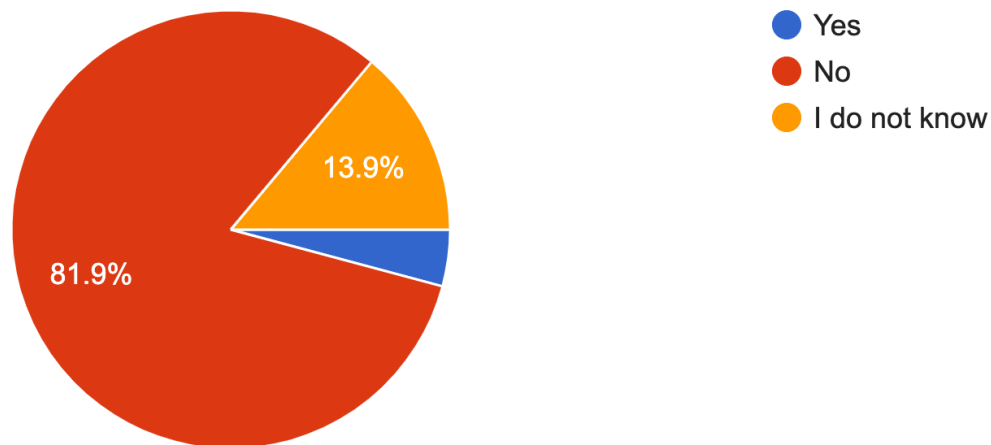

International Ocular Inflammation Society
Survey

July 2020

Uveitis / Ocular Inflammation in the COVID-19 pandemic

144 respondents from 44 countries

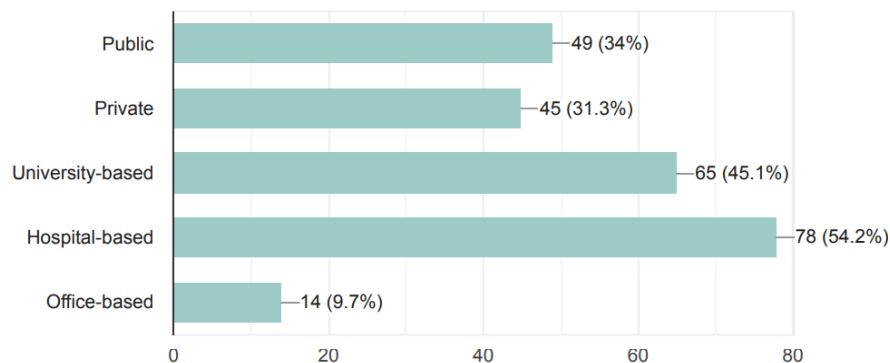

Have you been infected with SARS-Cov2?
144 responses

Uveitis / Ocular Inflammation in the COVID-19 pandemic

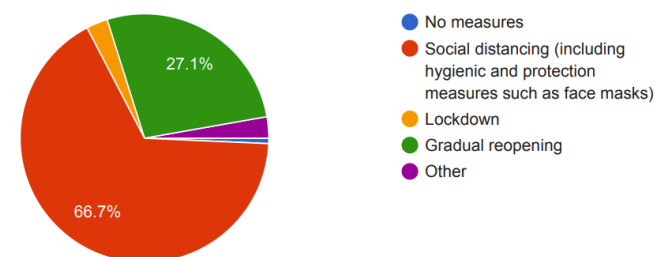

What is your type of uveitis / ocular inflammation practice?

144 responses

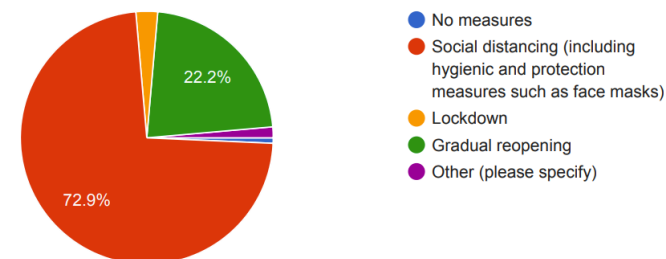

What is the current situation of social distancing measures against COVID-19 in your country?

144 responses

What is the current situation of social distancing measures against COVID-19 in your city of uveitis practice?

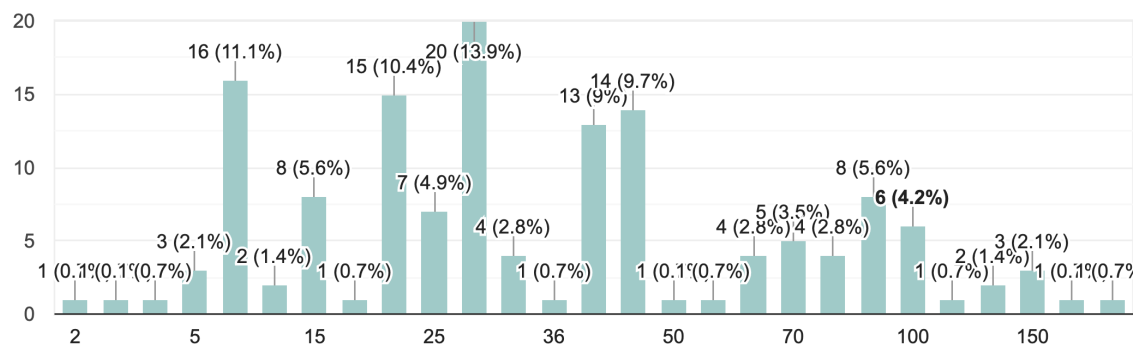

144 responses

Uveitis / Ocular Inflammation in the COVID-19 pandemic

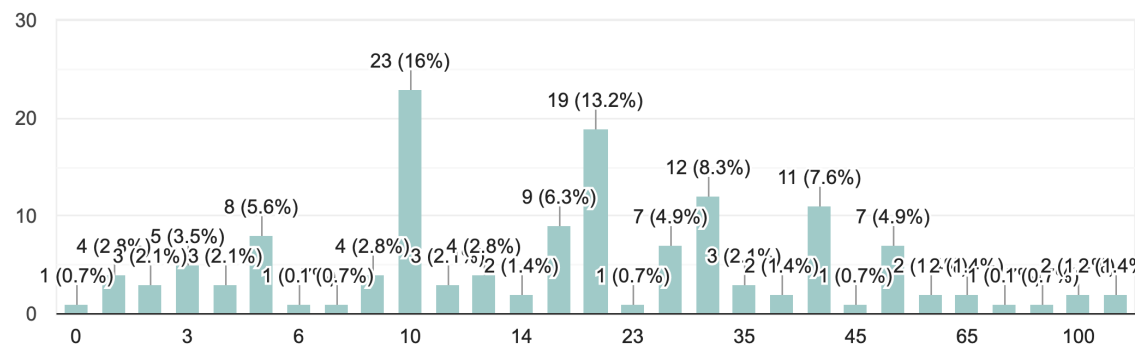

On average, how many patients with uveitis / ocular inflammation per week did you normally see before the pandemic?

144 responses

On average, how many patients with uveitis / ocular inflammation per week do you currently see during the pandemic?

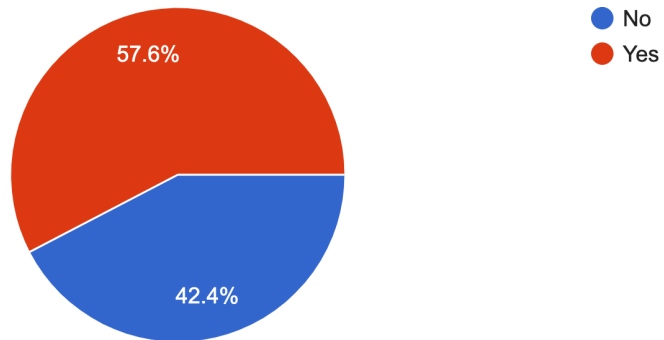

144 responses

Uveitis / Ocular Inflammation in the COVID-19 pandemic

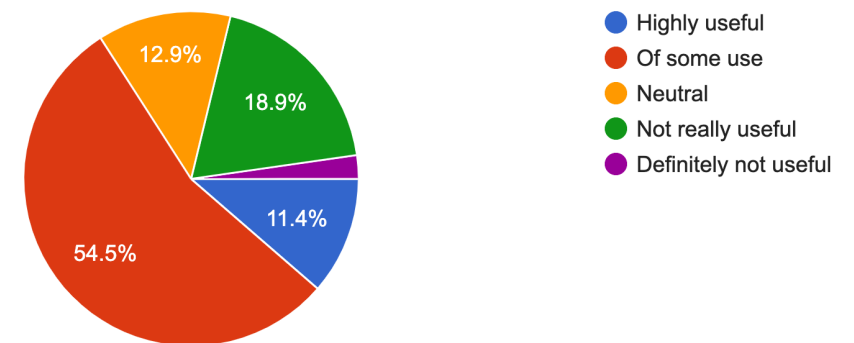

Are you currently using telemedicine tools to provide care / advice for your patients with uveitis / ocular inflammation during the COVID-19 pandemic?

144 responses

If so, what is your opinion on the role of telemedicine tools at the moment?

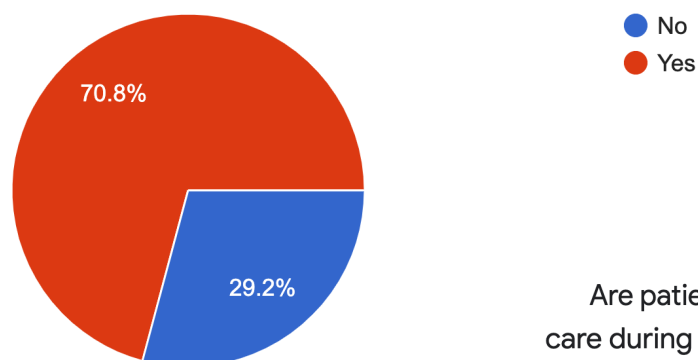

132 responses

Uveitis / Ocular Inflammation in the COVID-19 pandemic

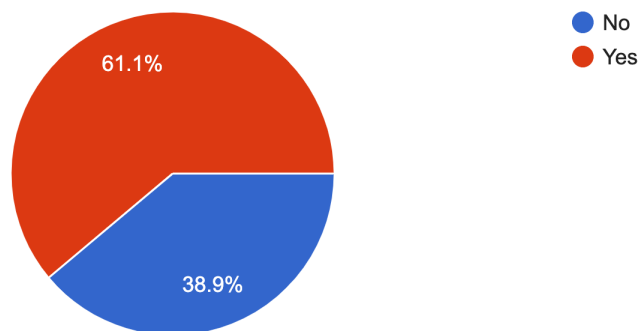

Did access to uveitis / ocular inflammation care in your city change during the pandemic?

144 responses

Are patients with uveitis / ocular inflammation in your city experiencing any delay in specialized care during the pandemic?

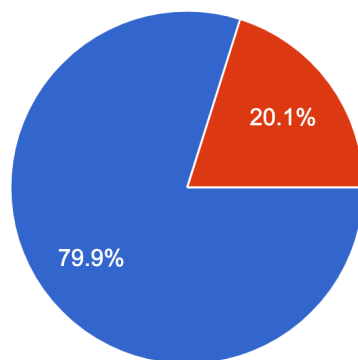

144 responses

Uveitis / Ocular Inflammation in the COVID-19 pandemic

Have you had drug shortage potentially affecting care of your patients with uveitis / ocular inflammation during the pandemic?

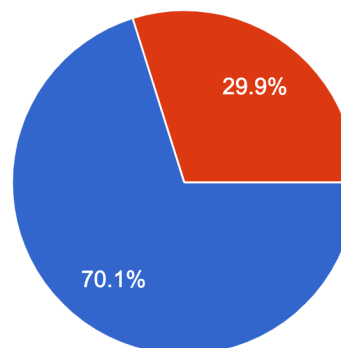

144 responses

● No
● Yes

Did your patients with uveitis / ocular inflammation experience intravitreal injection delays during the pandemic?

144 responses

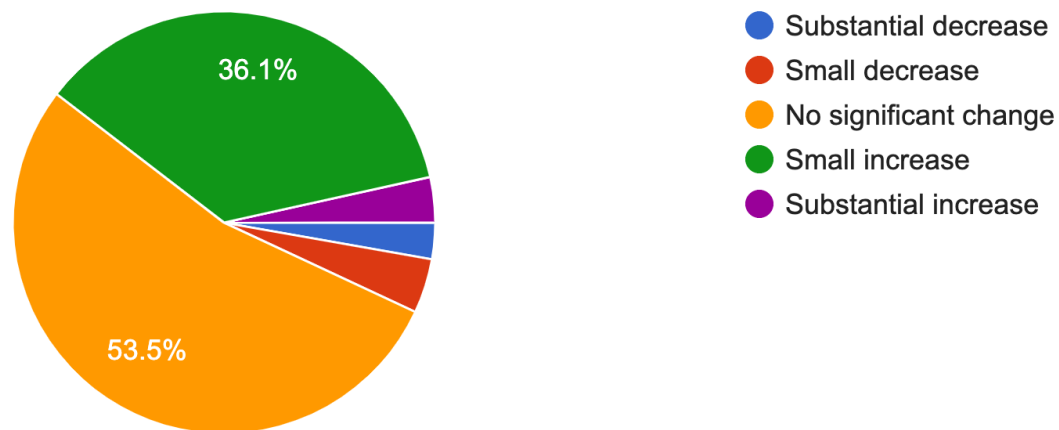

● No
● Yes

Uveitis / Ocular Inflammation in the COVID-19 pandemic

How do you rate the occurrence of local complications of uveitis / ocular inflammation with the COVID-19 pandemic:

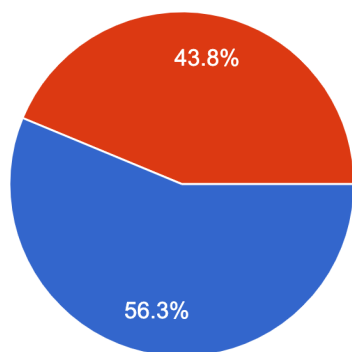

144 responses

Uveitis / Ocular Inflammation in the COVID-19 pandemic

Did you change your management strategy for patients with uveitis / ocular inflammation during the pandemic?

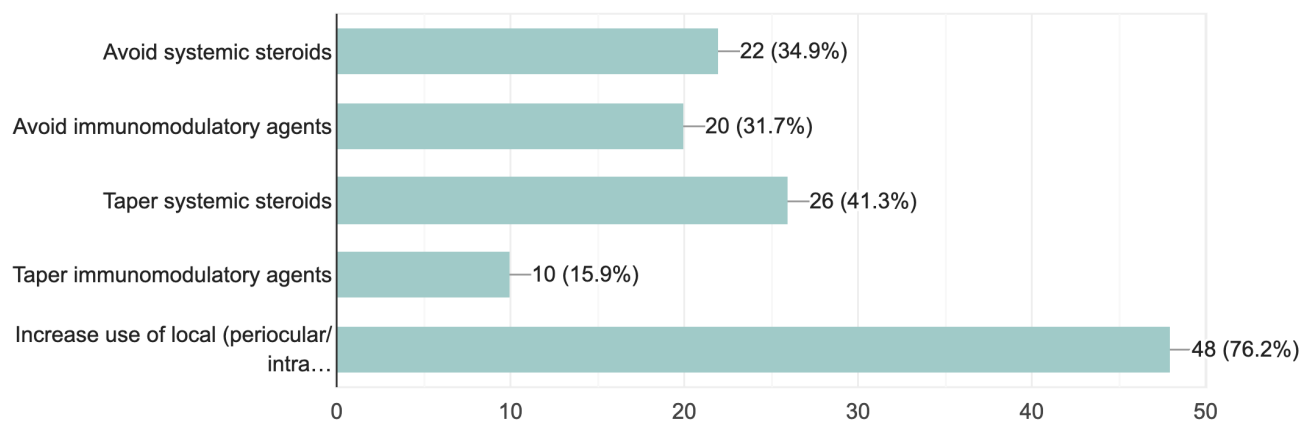

144 responses

● No
● Yes

Please indicate your change(s) bellow:

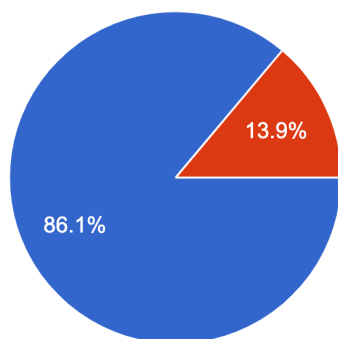

63 responses

Uveitis / Ocular Inflammation in the COVID-19 pandemic

Have you had any patient diagnosed with COVID-19 developing ocular inflammation presumably associated with the disease?

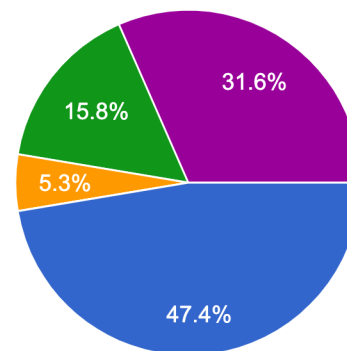

144 responses

Please specify:

19 responses

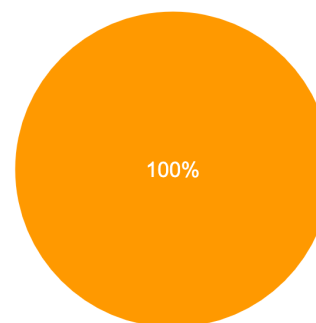

● No
● Yes

● Conjunctivitis
● Keratitis
● Scleritis
● Uveitis
● Other

Please indicate the anatomic classification of uveitis presumably associated with COVID-19

3 responses

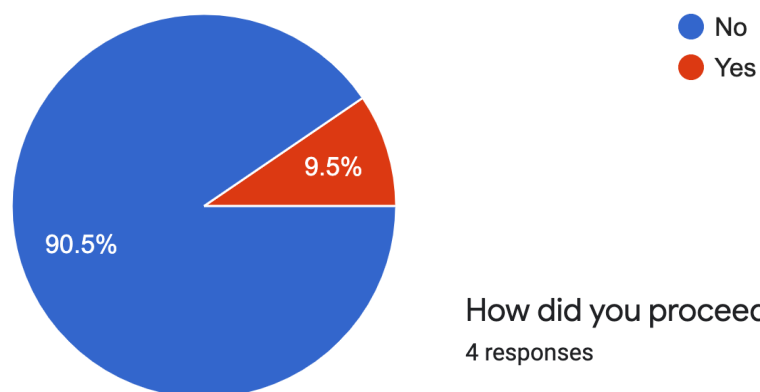

● Anterior uveitis
● Intermediate uveitis
● Posterior uveitis
● Panuveitis

Uveitis / Ocular Inflammation in the COVID-19 pandemic

Did you notice any change in uveitis / ocular inflammation during the course of COVID-19?

42 responses

How did you proceed with uveitis / ocular inflammation therapy in face of SARS-Cov2 infection?

4 responses
